## PROFESSIONAL SUMMARY

IT Support Engineer with 2+ years of hands-on experience delivering desktop support, network administration, VoIP deployment, and Linux/Windows system administration. Proven ability to configure and troubleshoot hardware, software, and network infrastructure; manage IP telephony environments; and maintain high-availability telecom services. Recently deployed 25+ IP phone endpoints and maintained 99.9% service uptime. Seeking an IT Support / Desktop Support role where I can contribute practical technical skills and a service-first mindset to a growing IT team.

## TECHNICAL SKILLS

- **Operating Systems:** Windows 10/11 and Windows Server basics, Active Directory (user/group management, password resets)
- Linux administration (Rocky/CentOS) - user permission management, system configuration, log monitoring
- **Networking:** TCP/IP, LAN/WAN, DHCP, DNS, subnetting, switch/router configuration basics, firewall fundamentals
- Network troubleshooting, cable/connectivity testing, LAN/WAN monitoring, Ping/Traceroute/NSLookup diagnostics
- **Telephony (VoIP / IP-PBX):** VoIP and SIP fundamentals, IP-PBX and IP Phone deployment, Asterisk-based telephony server configuration
- Provisioning IP endpoints, configuring extensions, call routing, and telephony server administration
- **Hardware & Peripherals:** Desktop/laptop/printer hardware installation, configuration, diagnostics, and preventive maintenance
- **Productivity & Service Desk:** MS 365 / Office applications, ticketing & SLA workflows, remote support tools (RDP/AnyDesk/VNC), service desk operations

## PROFESSIONAL EXPERIENCE

### Cromptech Integrated Solutions Pvt. Ltd. - IT Support Engineer

December 2024 - Present | Delhi, India

- Installed, configured, and maintained desktops, laptops, printers, and network devices for end users.
- Provided technical support and troubleshooting for hardware, software, and network connectivity issues.
- Managed VoIP server operations and user provisioning, ensuring reliable telephony services.
- Performed preventive maintenance and system health monitoring to reduce downtime and support continuity.
- Assisted with network troubleshooting and infrastructure support, maintaining stable LAN/WAN connectivity.
- Collaborated with internal teams to optimize system performance and implement IT solutions, and administered VoIP server software including user permissions and server-side connectivity issue resolution.

## PROJECTS

## TDI Bhikaji Cama Place - IP Phone Deployment

June 2026 - Present | New Delhi, Delhi

- Implemented and configured IP Phone (VoIP) systems, including installation and provisioning of IP phones across the organization.
- Ensured seamless connectivity and call functionality, and delivered post-deployment support and troubleshooting.

## LG House, Civil Lines - VoIP & Linux Server Deployment

May 2025 - June 2025 | Delhi, India

- Successfully deployed and provisioned 25+ IP Phone endpoints in an enterprise environment.
- Configured, optimized, and maintained the VoIP communication server on Rocky Linux.
- Managed Linux server administration, including user permissions and network configurations.
- Monitored system logs and performance to maintain 99.9% telecom service uptime.

## EDUCATION

- **Degree:** Bachelor of Computer Applications (BCA) with AI Engineering - Punjabi University, Patiala | 80% | 2020 - 2024
- **School:** Senior Secondary (12th) & Secondary (10th) - Sunrise Public Higher Secondary School

## PROFESSIONAL INTERESTS

Network Administration - VoIP Technologies - Artificial Intelligence - IT Infrastructure Management - Emerging Technologies - Cybersecurity Fundamentals

## ACTIVITIES & ACHIEVEMENTS

- **Tech Community Engagement** Actively participate in technical forums, online communities, and technology discussions focused on networking, VoIP, and AI.
- **Continuous Learning** Regularly explore open-source IT tools, network simulation platforms, and AI technologies to enhance technical expertise.
- **Home Lab Development** Designed and maintained a personal lab environment for testing LAN/WAN configurations, firewall policies, and self-hosted VoIP solutions.
